**Ecological Processes in Coastal and Marine Systems** a frank appraisal of the present status of marine research. Although many introductory ecological texts stress the so called ecosystem approach, individual marine research projects seldom encompass this broad course. There is, in fact, a real need for system-wide studies at both the theoretical and applied levels.

**The impacts of climate change in coastal marine systems ...**

Abstract. Anthropogenically induced global climate change has profound implications for marine ecosystems and the economic and social systems that depend upon them.

**The impacts of climate change in coastal marine systems ...**

More importantly, temperature is only one of a suite of potentially interacting climatic variables that will drive future ecological change in marine systems. Finally, studies conducted on population and community level processes suggest that climatic impacts on individual organisms do not necessarily translate directly into changes in distribution and abundance.
