Most major areas in the field are included, such as epidemiology of familial cancer, molecular analysis and diagnosis, clinical expression, treatment and prevention, counseling and the health economics of familial cancer. Familial and hereditary types of breast cancer | beautiful ...

Home / The breast / Genetic Factors / Familial and hereditary types of breast cancer; Familial and hereditary types of breast cancer. Women with a significant risk of breast cancer frequently have multiple first degree relatives affected by the disease at an early age or have one or more relatives with multifocal or bilateral breast cancer.

Population at Cancer Risk: Sporadic, Familial, Hereditary

Familial Cancer Cancer likely caused by a combination of genetic and environmental risk factors. People with familial cancer may have one or more relatives with the same type of cancer; however, there does not appear to be a specific pattern of inheritance (e.g., the cancer risk is not clearly passed from parent to child).

Family Cancer Syndromes - American Cancer Society

Many family cancer syndromes are caused by inherited mutations in tumor suppressor genes. These are genes that normally keep cells under control by slowing down how often they divide (to make new cells), repairing DNA mistakes, or telling cells to die at the right time.

Hereditary Cancer-Related Syndromes | Cancer.Net
