Layer Adapted Meshes for Reaction Convection Diffusion

A classification and a survey of layer-adapted meshes for reaction-convection-diffusion problems are included. This structured and comprehensive account of current ideas in the numerical analysis for various methods on layer-adapted meshes is addressed to researchers in finite element theory and perturbation problems. Finite differences, finite elements and finite volumes are all covered.

Layer adapted meshes for convection diffusion problems

In the present paper, a classification and a survey are given of layer-adapted meshes for stationary convection-dominated convection diffusion problems. For a number of standard numerical schemes, theoretical results are presented that demonstrate that the use of properly layer-adapted meshes yields robust methods, i.e., methods that perform equally well no matter how dominant the convection. We review a number of techniques used in the convergence analysis of these methods.
