[Low Angle Rescue Operations Level - Washington State](#)

Personnel trained, to the Operations level, in low angle rescue may attempt to gain access to patients in low angle situations. This access will be limited to those actions necessary to stabilize and/or treat the patient. Packaging and extrication of the patient shall be done with the assistance and direction of the Technical Rescue Team.

[Search & Rescue \(SAR\) | Search and Rescue Search & Rescue ...](#)

Search & Rescue (SAR) Harnesses Belts. When your team needs to perform high- or low-angle rescue operations, this kit includes the combined See Details.

[What's the Difference Between High & Low Angle Rescue?](#)

Rescuers are also fully dependent on the rope system for upward travel because of how much higher the angle is compared to a low-angle rescue. High angle rope rescue. High angle rescue is considered to be terrain that has a slope angle of 60 degrees and higher. Examples of industrial work hazards that may require high angle rope rescue are wind turbines, towers, pipe cracks, ledges and tanks.
