Modifications of Einstein's Theory of Gravity at Large

In this volume, various aspects of modified gravity at large

scales will be discussed: high-curvature gravity theories;

general scalar-tensor theories; Galileon theories and their

cosmological applications; F(R) gravity theories; massive,

new massive and topologically massive gravity; Chern-

Simons modifications of general relativity (including

holographic variants) and higher-spin gravity theories, to

name but a few of the most important recent

developments.
