MODULA-2 FOR PASCAL PROGRAMMERS by Richard Gleaves ...

Modula-2 is Niklaus Wirth's newest programming language. Pascal, his first language written in the late sixties, was designed principally for teaching structured programming.

Modula-2 - Wikipedia

Modula-2 is a computer programming language designed and developed between 1977 and 1985 by Niklaus Wirth at the Swiss Federal Institute of Technology in Zurich as a revision of Pascal to serve as the sole programming language for the operating system and application software for the personal workstation Lilith. The principal concepts were:
