Integrable nonlinear evolution equations on a nite interval

Regarding initial boundary value problems for nonlinear integrable evolution equations on the half-line we note the

following: The rigorous implementation of the method of [3] to the nonlinear Schrödinger equation (NLS) was presented in [5]. Analogous results for the sG, the KdV (with dominant surface tension) and the mKdV II equations were presented in [6] and [7]. The most difficult step in the method of [3] is the analysis of the global relation.
