Periodic Solutions of Nonlinear Dynamical Systems ...
 Limit cycles or, more general, periodic solutions of nonlinear dynamical systems occur in many different fields of application. Although, there is extensive literature on periodic solutions, in particular on existence theorems, the connection to physical and technical applications needs to be improved.

exists a periodic solution of (3) (4) with amplitude rand and frequency ν . (One can measure the amplitude of the solution in a number of ways; for definiteness, use the 2 norm of the set of Fourier coefficients.) This result is illustrated by Figure 1, which plots the frequency of the periodic solution as a function of its amplitude r .

Optical solitons and periodic solutions of the (2 + 1 ...
 Many new exact solutions, which include bright soliton, dark soliton, singular soliton and periodic solutions, are obtained. The spatiotemporal evolution of some representative and typical solutions are given. These results can help one understand and interpret some nonlinear phenomena appearing in plasma, nonlinear optics and so on.

PERIODIC SOLUTIONS OF NONLINEAR TELEGRAPH EQUATIONS ...

This chapter discusses periodic solutions of nonlinear telegraph equations. It presents a study of generalized periodic solutions of nonlinear telegraph equations of the form $u_t + u u_{xx} = g(u) + h(x)$ where g is a continuous real function and h is Lebesgue integrable over \mathbb{R}^2 with $h \in [0, 2]$.

dynamical systems - Periodic solution of nonlinear ...

It follows that SyS is bounded and not periodic. Hence $Sz(t) = 1 - \frac{1}{2} \sqrt{2} y_2(0)$ is not periodic. As an aside, a small amount of extra work shows that $S[\lim_{t \rightarrow \infty} y(t) = (\pi, 0)]^T S$.
