We summarize our knowledge of the phase behavior of polymer solutions and blends using a unified approach. We begin with a derivation of the Flory Huggins expression for the Gibbs free energy of mixing two chemically dissimilar polymers. The Gibbs free energy of mixing of polymer solutions is obtained as a special case. Polymer Blends: Phase Behavior and Property Relationships ...

The phase behavior of multicomponent polymeric materials is a crucial factor in determining their physical properties and subsequently their utility. For systems forming separate phases, the important issues are phase
