[Radiation Therapy for Cancer - National Cancer Institute](#)

Radiation therapy (also called radiotherapy) is a cancer treatment that uses high doses of radiation to kill cancer cells and shrink tumors. At low doses, radiation is used in x-rays to see inside your body, as with x-rays of your teeth or broken bones.

[Radiation therapy - Wikipedia](#)

Radiation therapy or radiotherapy, often abbreviated RT, RTx, or XRT, is therapy using ionizing radiation, generally as part of cancer treatment to control or kill malignant cells and normally delivered by a linear accelerator. Radiation therapy may be curative in a number of types of cancer if they are localized to one area of the body.

[Radiation therapy - Mayo Clinic](#)

Radiation therapy is a type of cancer treatment that uses beams of intense energy to kill cancer cells. Radiation therapy most often uses X-rays, but protons or other types of energy also can be used.

[Radiation Therapy Types & Side Effects - MedicineNet](#)

In radiation therapy (also called radiotherapy), invisible high-energy rays or beams of subatomic particles are used to damage cancer cells and can stop them from growing and dividing. This ultimately can kill the cancer cells treated with radiation. A specialist in radiation therapy is called a radiation oncologist.

[Radiation Therapy -- What It Is, How It Helps](#)

This easy-to-read guide offers a basic explanation of radiation therapy.

[Radiation therapy: Uses, types, and side effects](#)

Radiation therapy uses waves of radiation to treat cancers and tumors, as well as other conditions. As a general term, radiation means waves of energy, such as light or heat.

[Radiation therapy - What it is and how it helps - Cancer ...](#)

Radiation therapy, also known as radiotherapy, is one of the main treatments for cancer. Being prepared and understanding radiation therapy can help lessen some of the stress surrounding your treatment.

[Side-Effects of Radiation Therapy for Cancer Treatment - WebMD](#)

Radiation therapy treats cancer by using high-energy waves to kill tumor cells. The goal is to destroy or damage the cancer without hurting too many healthy cells.

[What to Expect When Having Radiation Therapy | Cancer.Net](#)

External-beam radiation therapy delivers radiation from a

machine outside the body. Each session is quick and painless, lasting about 15 minutes. Typically, patients have treatment sessions 5 times per week (Monday through Friday). This schedule continues for 3 to 9 weeks.
