### Turkana Boy - Wikipedia

Turkana Boy, also called Nariokotome Boy, is the name given to fossil KNM-WT 15000, a nearly complete skeleton of a Homo erectus youth who lived at c. 1.5 to 1.6 million years ago. This specimen is the most complete early human skeleton ever found. It was discovered in 1984 by Kamoya Kimeu, a member of a team led by Richard Leakey, at Nariokotome near Lake Turkana in Kenya. Estimates of the individual's age at death range from 7 to 11 years old.

The Nariokotome Homo Erectus Skeleton Buch portofrei ...

Produktinformationen zu The Nariokotome Homo Erectus Skeleton 1984 wurde am Turkana-See in Kenia das Skelett eines 1,5 Millionen Jahre alten Jungen gefunden; der weitaus lteste Fund eines Homo erectus - nachdem Wissenschaftler mehr als ein Jahrhundert lang in Afrika und Asien nach dem Ursprung der Menschheit gefahndet hatten. Dieses Buch gibt eine komplett bebilderte Beschreibung des Fundortes sowie aller Skeletteile.

The Nariokotome Homo Erectus Skeleton - springer.com

The partial skeleton of Homo erectus found in Kenya by Alan Walker, Richard Leakey, and others is truly one of the great discoveries in paleoanthropology, after the world's best paleoanthropologists have diligently searched for traces of Homo erectus in Africa and Asia for a century.

Nariokotome | archaeological site, Kenya | Britannica.com

In the context of human evolution, the Nariokotome youth and other African H. erectus/H. ergaster specimens reveal a pattern of descent with modification. They are evidence that the basic human body size and shape had evolved by 1.5 million years ago and probably as early as 1.9 million years ago.

### Turkana Boy Wikipedia

Turkana Boy oder Nariokotome Boy bezeichnet das Fossil eines m mlichen Individuums der Gattung Homo, dessen an ergew hnlich vollst ndig erhalten gebliebenes Skelett im August 1984 in Kenia am Nariokotome-Fluss, rund 5 km westlich des Turkana-Sees, entdeckt wurde.

Turkana boy - Simple English Wikipedia, the free encyclopedia

Turkana boy, or Nariokotome boy, is the fossil KNM-WT 15000. It is a nearly complete skeleton of a hominid who died in the early Pleistocene 1.5 million years ago (mya). This specimen is the most complete early human skeleton

ever found.
