The book examines contemporary urban challenges and opportunities within the context of the traditional Malthusian theory. The book reorients the classic Malthusian debate on population and food by focusing on global urbanisation and its consequences for peoples access to basic means of subsistence.

The phenomenon of rapid global urbanisation, urban trends and processes have recently become a topic of increased scholarly inquiry. Yet, little attention has been paid to how urbanisation fits within the post-Malthusian framework and how it affects the most basic resources essential for human survival. By attempting to fill this gap, this thesis contributes, both conceptually and empirically, to the current body of literature on population and development.
